Editors-in-Chief:

Henk Folmer, University of Groningen and University of Wageningen
(Coordinating Editor)

Luc Anselin, University of Illinois, Urbana- Champaign
Roberta Capello, Politecnico di Milano
Yoshiro Higano, University of Tsukuba

Letters in Spatial and Resource Sciences (LSRS) publishes high-quality, shorter papers on new theoretical or empirical results, models and methods in social sciences that contain a spatial dimension. It especially solicits manuscripts from regional science, regional and urban economics, geography, environmental and resource economics, demography, agricultural economics, GIS and spatial econometrics and planning. Examples of suitable contributions would be new formal derivations of theoretical or methodological results, new empirical findings, replications of empirical studies using new methodological approaches, short communications on new algorithms, evaluations of spatial econometric methods and meta-analyses. As a Letters Journal, it consists of concise communications (under 10 pages in length) that provide a means of rapid and efficient dissemination. It allows readers to determine their potential interest in a letter and to digest a large amount of information rapidly. LSRS also intends to contribute to the dissemination of theories and methodologies across disciplinary borders. The only letters journal in its field, LSRS is a valuable addition to the specialists literature in offering quick dissemination and easy accessibility of new results. Each article in LSRS is reviewed by two peer reviewers in a double blind fashion and classified according to the JEL classification system. www.springer.com/journal/12076

First issue due in March 2008

Submission of manuscripts from March 15, 2007 on:

Authors are encouraged to submit their manuscripts to the editors in chief logging on to: <http://www.editorialmanager.com/lrsr/>

Manuscripts will undergo a double blind peer review process.
